LETTER FROM THE OWNERS

As owners of GNET, we would like to take this opportunity to introduce you to our corporation. This corporation profile outlines our vision, mission, philosophy, and national corporate ideals, which continued the success of our group and partners.

Since its establishment in 2020, our group has had exceptional success with each subsequent year. Empowered by our achievements, our corporation has successfully expanded within the kingdom.

We aim to build upon our success and sustain our solid momentum nationwide. To ensure we do so, we continuously set ambitious new targets and expect our performance to be measured by their realization. Regarding dedication, perseverance, and successful strategy implementation and execution, GNET is your partner of choice.

**AbdulBasit Almomin
& Riyadh AlHashmi**

LETTER FROM OUR MANAGING DIRECTOR

As MD of GNET, I would like to give you some insights into our corporation. I've worked alongside the owners in building this great company from the ground up. In a short time, we have built a great client base in the IT industry, including some VIP clients. It has been our number one priority to maintain the trust and expectations of our clients.

As a market-leading digital transformation enabler in Saudi Arabia, GNET has partnered with Microsoft, Cisco, and Dell EMC to help you evolve with the latest IT products and solutions that free you to focus on your business while we focus on the technology that runs in doing so, Gnet is resolute in becoming recognized and acknowledged as a leading and respected global business partner.

SAMEER MEMON

COMPANY OVERVIEW

GNET is a 100% Saudi - owned private company that was incepted in the year 2020.

Gnet has seen an exponential increase in its sale of cloud and hosting services provided throughout the Kingdom.

The team at Gnet consists of IT professionals who share a cumulative industry experience of 80+ years.

It was formed as a system integrator with the main focus on smart technology and innovative solutions.

Team for your support across all major cities of Saudi Arabia.

OUR GOAL

We aim to build upon our success and sustain our strong momentum nationally. To ensure we do, we continually set ambitious new targets and expect our performance to be measured by their realization. Regarding dedication, perseverance, and successful strategy implementation and execution, Gnet is your partner of choice. We provide the best possible results and the most satisfying outcome, as we have consistently proven with all our clients. Also, Gnet is focusing on Artificial Intelligence activities in the 2030 vision.

Cloud Services

IT Work & Configuration Management

GNET prides itself in providing the next Gen smart IT solution, with a solid reputation of quality and reliability, providing a wide array of services to individuals and businesses. We do it with the utmost discretion and professionalism. ISO 9001-2008 certified that capable of meeting all IT-related needs to your satisfaction. We provide our clients with the most reliable and stable environment with telecommunications and IT End-to-End solutions such as cabling & networking work, Firewalls, Infrastructure, etc.

DATA NETWORKS

Gnet provides interconnected communication systems to meet customers' current and future needs.

From connecting traditional telephony with computing, carrier services, video conferencing, and more, networking your communication allows us to connect clients to their customers and the world. Servers, routers, switches, wireless LAN, and telephony combine to form a unified infrastructure to best meet an organization's communication requirements.

As a top-class IT market leader and digital transformation enabler in Saudi Arabia, Gnet also provides an extensive array of IT infrastructure solutions that best suit the unique needs and budgets of small, midsize, and large businesses in Jeddah, Riyadh, and western KSA. Our wide array of IT solutions covers all your needs, from traditional 3TA to converged and software-defined hyper-converged infrastructure solutions to virtualization, data and midrange storage solutions, and more. We focus on helping Saudi businesses solve IT pain points, promote IT security, boost operational flexibility, reduce costs, and smoothly accomplish their IT and business objectives.

DEDICATED INTERNET ACCESS(DIA).

01 SERVICE DETAILS

- DIA is ideal for business applications in a company that aims to provide its employees with high-speed and secure Internet solutions through its current network (1:1).
- DIA is specially designed to support the application of data via the following:
 - Internet
 - E-mail
 - Web-based application
 - Served through fiber and MW

02 HIGH FLEXIBILITY

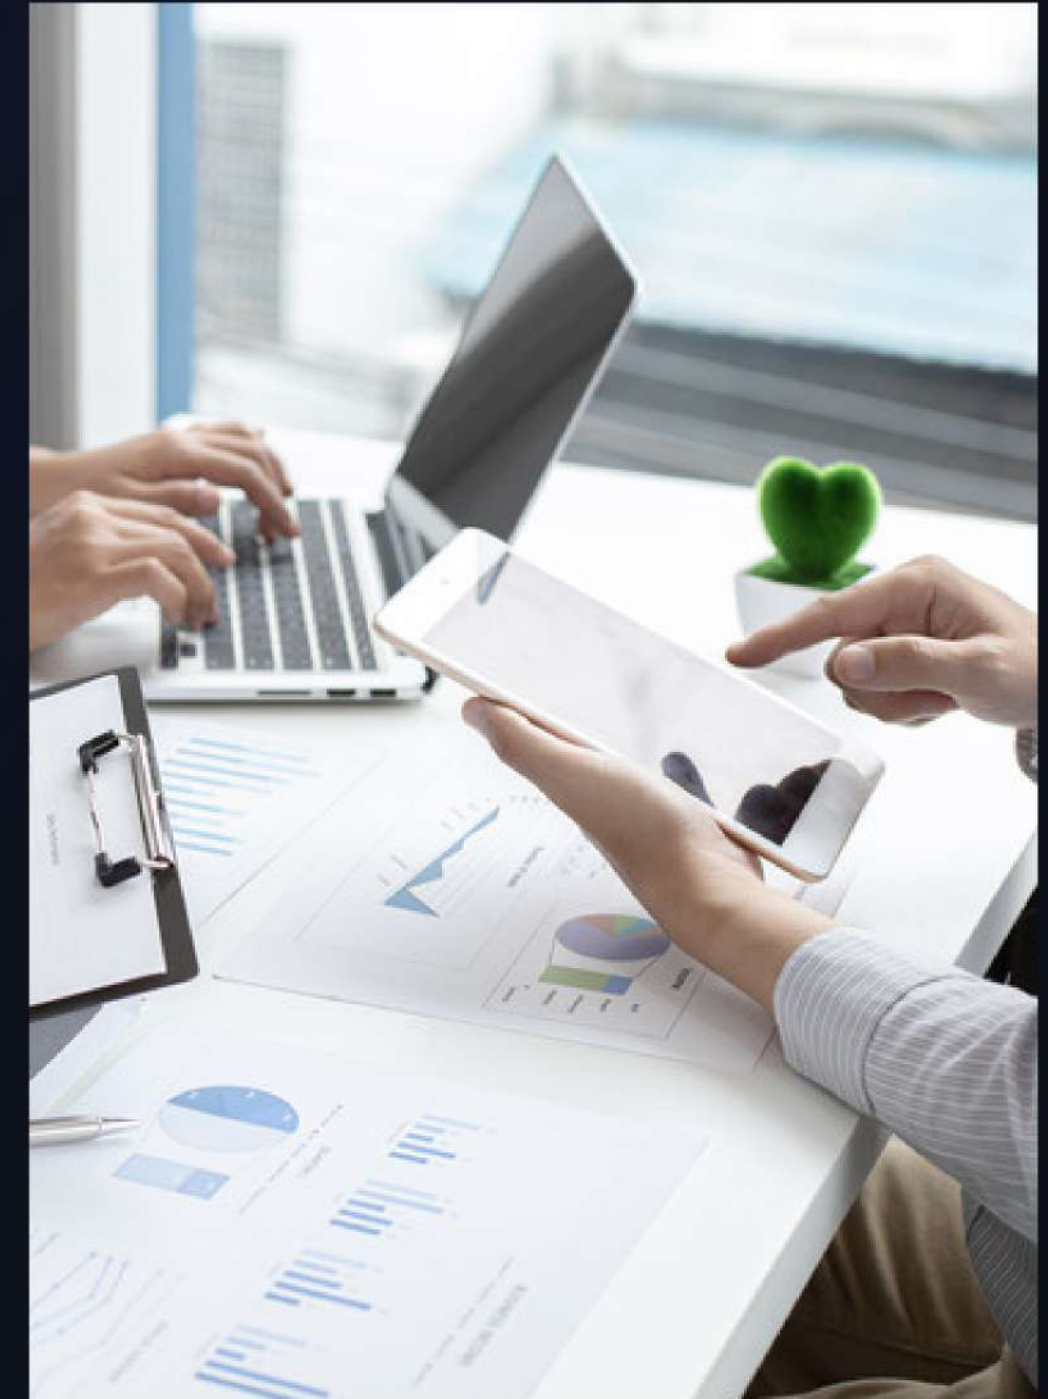

Our exceptional track record in providing unmatched Internet service to businesses has made us the go-to choice for enterprises across different industries, from SMEs to large corporations, to our state of the art—such infrastructure coupled with our expert teams. Extensive technical knowledge has enabled us to deliver great enterprise Internet services resulting in increased efficiency and productivity for our clients.

03 HIGH AVAILABILITY

- The DIA service is independent of distance. Customers can be connected to any ISP no matter where their business or ISP is located. Operator Grade service dedication on physical last mile

04 SPEED

- GNET DIA offers speeds that start at 1 Mbps and reach up to 2 Gbps

CLOUD SERVICES

GNET Cloud makes deploying cloud-hosted virtual Windows desktops incredibly easy in less than 10 clicks. Our fully managed virtual desktop solution provides small business owners and IT managers more time to focus on core business initiatives.

Our virtual cloud desktop service is cost-efficient, fast, and scalable. Unlike other popular offerings, GNET Cloud does not require in-depth training or certifications to deploy cloud desktops.

Services

Access Control and
Time Attendance
Solutions

Gnet, a Cisco Partner, offers a comprehensive portfolio of Cisco data center switches, routers, network infrastructure, collaboration, wireless, unified communications, IP phone systems, hosted solutions, call centers and TelePresence video conferencing solutions, and Cisco Router ISR 4331 SEC.

ACCESS CONTROL SOLUTIONS

IP TELEPHONY

Gnet offers IP Telephony for companies that want to be mobile and efficient. An IP phone works and looks like an ordinary office phone. The only difference is that the IP phone is not plugged into a phone jack but is instead connected to the Internet. The conversation, therefore, goes via the Internet instead of traditional telephone lines.

EMPLOYEE EVALUATION SERVICE

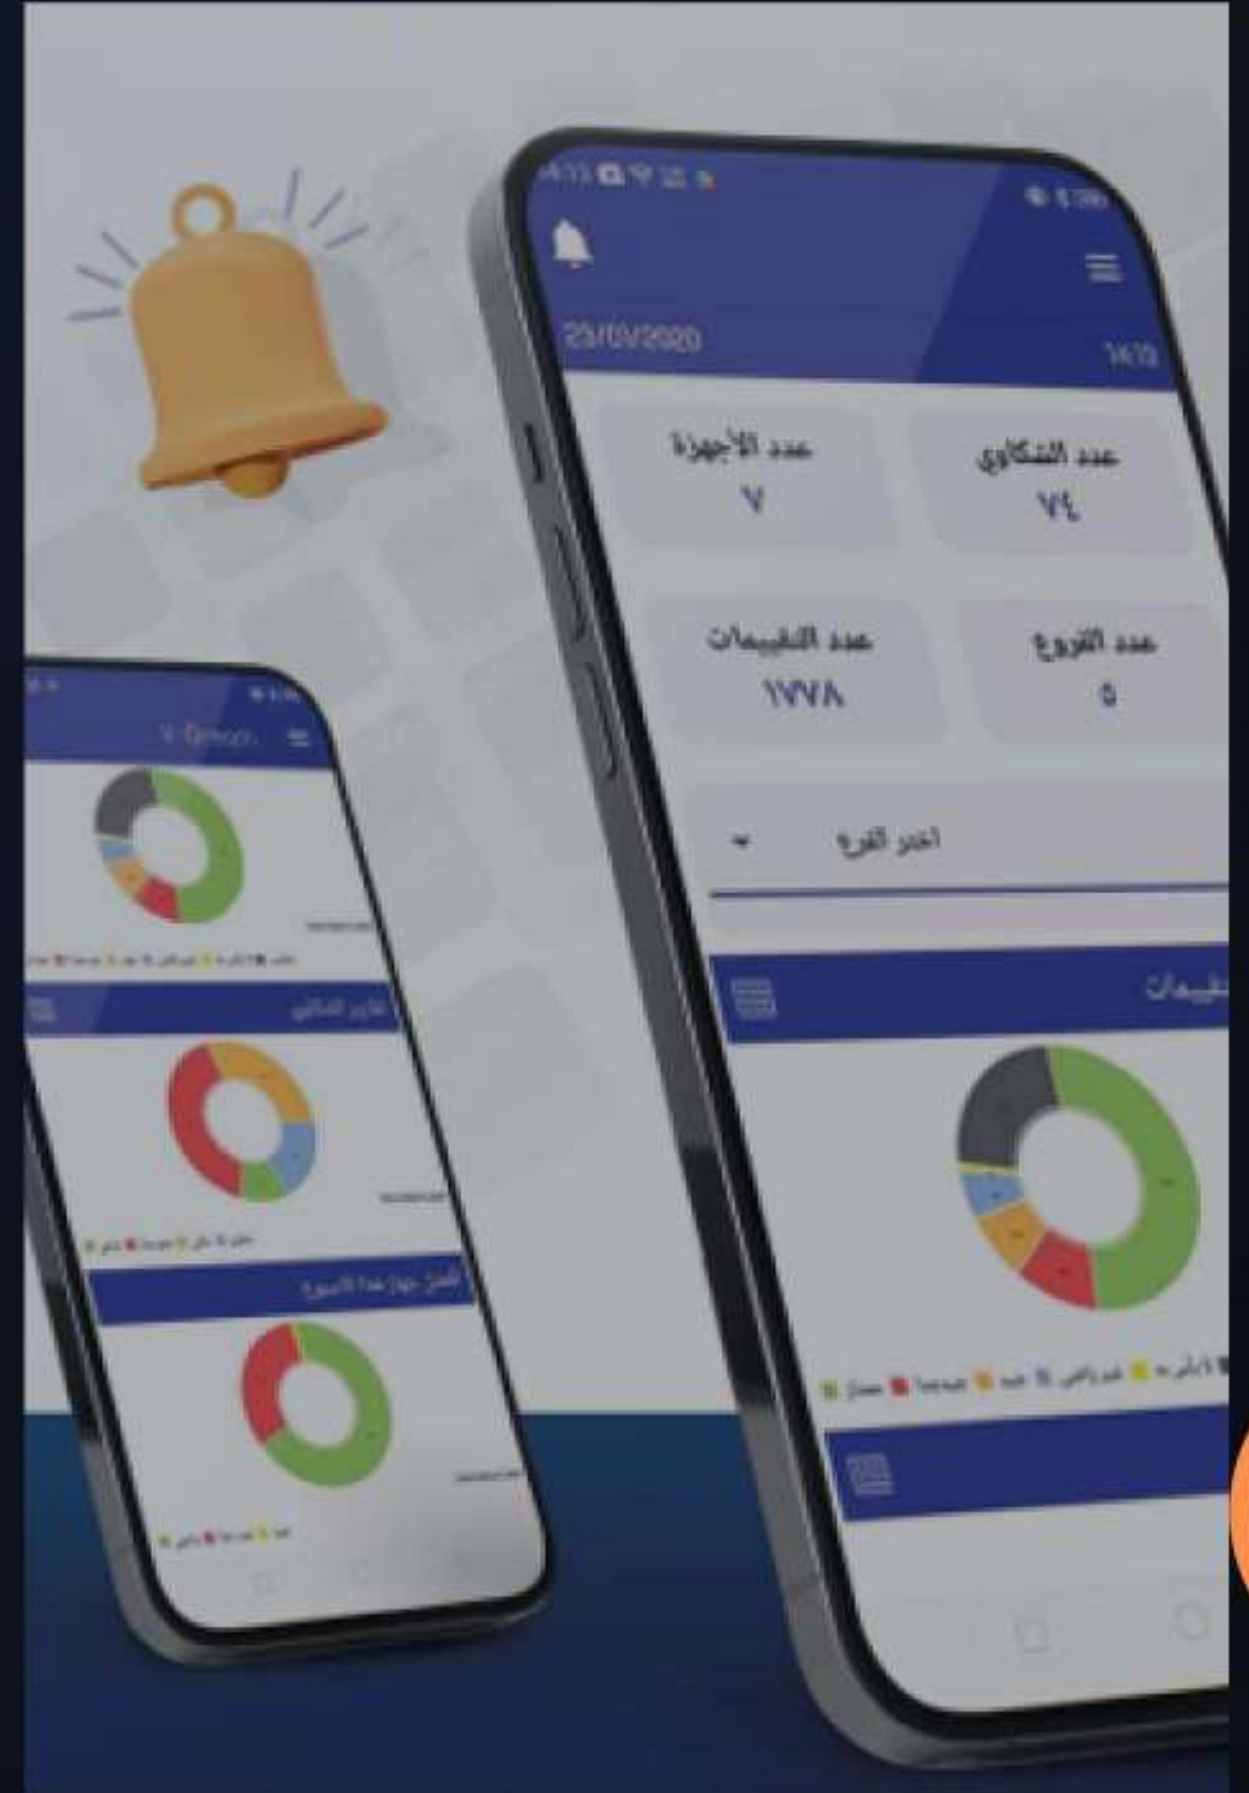

A System has been developed to suit all activities and services multi questionnaires to collect questionnaires.

- You can put all employees with their names and pictures and know the level of services.
- Compatible with all activities
- Send daily reports to email or mobile
- Fast control online

SYSTEM FEATURES

- Multiple Questions and Answers
- Inclusion of more than one administration
- Rating via QR
- Rating Via links
- Multiple branches and users
- Automatic daily report, weekly and monthly

Gnet provides to all modern organizations that must protect their physical and IP assets. The first step towards securing an organization is eliminating disintegrated, outdated technologies. Ensuring employees' safety and controlling people's movement with a predefined protocol is a must nowadays. Similarly, upgrading to future-ready technologies that provide zero errors is equally essential.

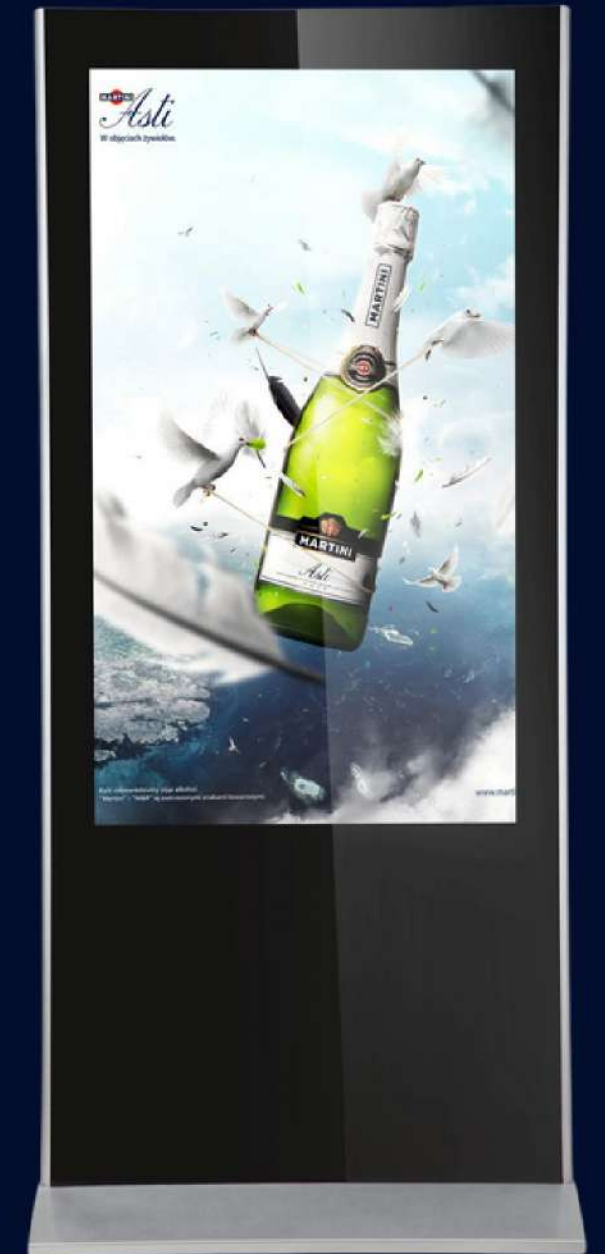

Digital Signage Solutions

Digital Signage forms a crucial aspect of the Hospitality and Retail Industries' advertising strategy. GNET Technologies fully comprehends that and hence offers cutting-edge Digital Signage Solutions for indoor and outdoor supply and installation, including a license that has an HD screen cased in a robust body and when placed correctly within an outlet can significantly.

SOFTWARE

- Comprehensive features rich Android Software with User-Friendly UI.
- Wireless Data Incorporation.
- Split Screen Functionality.
- Image Filling & Scheduling.
- Run Data on Multiple Screens.
- Remote Functioning, Such as Rebooting and Shutting down.

Interactive Screens

Our premium interactive displays enable simple, practical touch, interactions, advertisement, hospitality, and institute education sectors and serve a variety of industries. GNET provides 4K UHD Interactive Displays that rise above the rest to deliver best-in-class UHD resolution, intelligent UHD upscaling, and rich, flawless colors with Dynamic Crystal Color—all in a slim design With the Robust Frame Design.

INFRASTRUCTURE NETWORKING TECHNOLOGY

Our Infrastructure and Networking Technology (INT) Team Develops End-to-end Solutions To Build A Robust Framework for Our Clients' Businesses. This Encompasses Everything From Architecture Design Right Through To Project Implementation And Managed Services.
